- **Copa Caps** 20g or 10g
20G ACVM A004945, or 10G ACVM A005259

Talk to our vets today about doing an Animal Health Plan for your farm.

Cattle Lice Treatment

Treating lice in late summer/early autumn may be necessary but remember the earlier you treat your animals the higher the likelihood that you'll need to treat again, as numbers have a longer period to re-populate, and winter is when conditions are optimal. You can target just lice with **Destruct** (organophosphate) and **Blaze** (synthetic pyrethroid), or you can use products like **Cydectin** Pour-On for Cattle and **Reflex** Pour-On (Abamectin has a 35-day Milk WHP so can only be applied at dry-off) which will target both lice as well as internal parasites.

Destruct ACVM A005740, Blaze ACVM A008214, Cydectin Pour-On ACVM A006203, Reflex Pour-On ACVM A010666

Zolvix Plus in stock NOW!

Why use Zolvix Plus?

Increasing levels of drench resistance can cost sheep farmers in lost productivity every year. Zolvix Plus should be considered for farmers quarantine, knock out, or exit drench.

DUAL ACTIVE
Monepantel 25mg/ml, Abamectin 2.1mg/ml
MEAT WHP
Sheep 14 Days, Cattle 19 Days

In stock now for your Exit Drench to clean up resistant worms left behind by routine drench programmes.

THE FIRST EVER FLEX ORAL LICE TREATMENT FOR SHEEP.

This flexible new oral product offers opportunities for farmers to manage lice treatment in key areas ...

- **Integrated whole-farm lice control**
 - At greater than 99.9% efficacy level, with proper planning, it will be possible to set up a lice control program where Flexolt treatment either eradicates lice, or treatment is only required once every few years.
- **Emergency Treatment**
 - Flexolt works regardless of wool length.
- **Convenience Treatment**
 - Flexolt will be a wonderful tool to control lice on small blocks or lifestyle units.
- **Split mob treatment**
 - Where ewes are being shorn and treated with a pour-on but not hoggets.

FLEXOLT

5 Litre

\$1,649.00

Including GST

Flexolt® Oral drench removes the stress of traditional lice treatment, and with a 99.9% efficacy, you may not need to treat lice for years.

* 5 Litres treats 555 x 60kg Sheep

What does my sheep drench strategy look like this year?

Ewe Pre-Tup Treatment

Things to consider when looking at worm treatment ...

- Refugia
- Targeted Treatment
- Return-on-Investment
- Seasonal Feed Supply

Late Autumn Treatment of remaining young stock

Exit Drench in late autumn ...

- Clean out of stock producing resistant eggs.

Pre-Lamb Treatment

Informed and targeted treatment of risk groups ...

1. No treatment • 2. Oral Triple Drench • 3. Long Acting injection
Plus consider ...

- Associated trace mineral requirements
- Refugia considerations
- Monitor worm challenge and drench efficacy

Spring Lamb Treatment

Spring Lamb Drench Programmes should consider ...

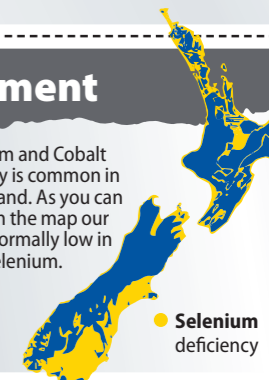

- High protein spring diets
- Timing of first drench?
- Drenching intervals?
- Monitor worm challenge and drench efficacy
- Triple oral drench with strategic use of novel drenches
- Refugia considerations

B12 & Selenium Supplement

SMARTSHOT®
B12 PLUS SE

Selenium and Cobalt deficiency is common in New Zealand. As you can see from the map our area is normally low in Selenium.

Long-acting Selenium and B12 restores deficiencies with the convenience of just one injection.

- B12 & Selenium for up to 6 months in ewes.
