Talk to our vets today about doing an Animal Health Plan for your farm.

copaject
INJECTION

Copper deficiency is a issue over winter due to molybdenum uptake via soil in low winter pastures and crops. Our vets can do liver biopsies and blood tests to check the copper levels in your stock.

* RVM only available with veterinary prescription after consultation. Copaject Injection ACVM A011573

Selovin LA
Long-acting Injectable Selenium Supplement

For the prevention and treatment of Selenium deficiency which can cause ...

- **Reduced growth rates**
- **Low fertility**
- **Low milk production**
- **White muscle disease**
- **Impaired immunity & ill thrift**

SELOVIN LA™ long-lasting injectable selenium supplement, providing up to 12 months protection in a single injection.

Autumn Drenching of your Dairy Herd

- **Timing is important** – apply early enough to get a production gain whilst still milking, and late enough to get an effective lice control.
- **Winter feed is expensive**, ensure it is well utilised by treating parasites in the herd prior to going onto winter feed reserves.
- **Autumn drenching and Spring drenching are an Investment** – trials repeatedly demonstrate production returns far outweigh cost of treatment.

What does my sheep drench strategy look like this year?

B12 & Selenium Supplement

SMARTSHOT
B12 PLUS SE

Selenium and Cobalt deficiency is common in New Zealand. As you can see from the map our area is normally low in Selenium.

Long-acting Selenium and B12 restores deficiencies with the convenience of just one injection.

• B12 & Selenium for up to 6 months in ewes.

Cattle Lice Treatment Options

Treating lice in late summer/early autumn may be necessary but remember the earlier you treat the higher the likelihood that you'll need to treat again, as numbers have a longer period to re-populate, and winter is when conditions are optimal. You can target just lice with **Destruct** (organophosphate) and **Blaze** (synthetic pyrethroid), or you can use products like **Reflex Pour-On** & **Cydectin Pour-On** which will target both lice as well as internal parasites which are more prevalent in autumn.
