It's back!

ECLIPSE POUR-ON for Cattle

NEW BOX
but that's all
that changed!

If you are looking at drenching your cattle over the next couple of months, Eclipse is Back!

Eclipse Pour-On
For the treatment and control of internal parasites (including endectocide resistant strains, and lungworm), and lice in cattle.

VET LSD[®] VETERINARY LIVESTOCK SURVIVAL DRENCH

High on Performance, Survivability and Profit!

Given to ewes Pre-Tup and Pre-Lamb for enhanced lamb survivability.

contains Vitamins A, C, D, E, Selenium, Chromium & Iodine

by the Big Blue Cross

For advice you can trust!

Check with your veterinarian to get the best product and avoid withholding problems!

Pre-Lamb **WORM DRENCHES** STRATEGIES

- Target Treatment**
Select animals based on risk. Target long-acting drenches towards multiples and light condition stock.
- Refugia**
Don't drench some stock to ensure that there are still worms that are susceptible to drench in the worm breeding population.
- Trace Elements**
These treatments are expensive. Only consider them when they give you a significant economic return.
- Information**
Base your decisions on facts.
 - Trace Element results
 - Drench Checks
 - Feed Budgets

Is Moxidectin Long Acting the right choice for my farm?

Involve your Vet in decision making around moxidectin long-acting injection treatments. Get advice on management techniques like refugia and drench testing, as we try to mitigate parasite resistance ... a real issue on farms today!

Long Acting Worm Control

- 91 Days protection against *Haemonchus contortus*
- 112 Days protection against *Ostertagia circumcincta*
- 42 Days protection against *Trichostrongylus colubriformis*

Use Exodus or Cydectin LA for long acting worm control from a single moxidectin subcutaneous injection. Dose 1ml/20kg
