

# FLY PROTECTION THIS SUMMER

## Pour-On Protection

**CLiK EXTRA**

20L

**\$1149**

14-26 Weeks protection  
21 days meat withhold

ACVM No. A011384

**CLiK SPRAY-ON**

20L ~~\$1119~~

**SPECIAL OFFER \$1079**

Up to 18 Weeks protection  
56 days meat withhold in Merino (35 days otherwise)

ACVM No A06006

**VETRAZIN**

10L

**\$169**

Spray On 10 Litre  
Up to 8 Weeks protection  
7 days meat withhold

ACVM No A5835

## Jetting/Dipping Products

**Elanco**

**Cyrex™ LIQUID**

7 days meat with hold

ACVM No A09917

■ 5000 litres of wash per 10 litre pack.

■ Instant kill & up to 12 weeks protection

**CYRAZIN K.O.**

7 days meat with hold

ACVM No A010635

■ 2500 litres of wash per 5 litre pack

■ Instant kill & up to 14 weeks protection

**CYRAZIN LIQUID**

7 days meat with hold

ACVM No A7509

■ 2500 litres of wash per 5 litre pack.

■ Up to 12 weeks protection.

## Calf Animal Health

What do you need to grow a calf into a \$1500 investment?

**Selenium**  
12 months selenium from a single injection!

ACVM No A9509

**Parasite Free**  
Combination injection knocking worms down!

ACVM No.A10399

**Sudden Death Prevention**  
Clostridial Vaccine

ACVM No.A0934

**Copper**  
Sustained release with capsule or injection

ACVM No.A9469

ACVM No.A005259 RVM

\*Only available with veterinary prescription

## Same drench ingredients give the same results??

**NO!** According to NZ research published in the international journal "Veterinary Parasitology" Cattle were tested for faecal egg reduction on 6 different farms comparing different drench treatments

ACVM No. A 9270

The Veterinary Centre stocks proven animal health products that we know will perform. We will always be competitive but never at the expense of quality or productivity.

- Eclipse was superior, achieving average egg reductions of 98%.
- Another brand gave an average egg reduction of 85% with one result being as low as 40%

Leathwick et al, Veterinary Parasitology, 2016

All prices and promotions in this issue valid until the end of the month or while stocks last.

FREE FAECAL EGG COUNT FEBRUARY

Check your drench is doing what you pay for and test for emerging anthelmintic problems - on us!

**SPECIAL OFFER**

- Free drench check with every 20 litre oral sheep drench purchased
- February only
- 10 lambs tested 7-10 days post drenching
- Free interpretation of results by your vet and written report

**FREE FOR FEBRUARY**

FREE FAECAL EGG COUNT FEBRUARY

## Drench Resistance Testing - Wanting to go a step further?

A full faecal egg count reduction test (with larval cultures) checks the effectiveness of each drench family against a range of worm species. Lambs are the ideal class of stock to test, so join the growing number of farmers taking this realistic step to protect their farming futures, and call us now to find out more or to book your farm in. It is critical you know how well the different drench families are working on your farm!

# ABORTION STORMS. TWO DISEASES. TWO VACCINES.

## WHY DO HALF THE JOB!

### TOXOVAX

All maiden ewes should be vaccinated at least 4 weeks prior to their first mating. Toxovax is a live vaccine manufactured to demand, so to ensure availability, you should place your order at least a month prior to your need.

#### PLAN FOR SUCCESS: ORDER YOUR TOXOVAX® NOW!

- ☑ Order from our vets at least 8 weeks before you intend to introduce the ram.
- ☑ One shot gives lifetime immunity.
- ☑ Up to 8% higher lambing percentages (3% national average).

It's not too late to order Toxovax now!

### CAMPYVAX4

Campyvac4 is equally important and has been shown to increase lambing by an average 9%. Apart from devastating campylobacter abortion storms, campylobacter remains a significant cause of unnoticed abortions and the births of dead or weak lambs. Protect maiden ewes with two shots, 4-6 weeks apart, prior to mating, or one shot in previously vaccinated ewes.

To get the best from your flocks performance for the next lambing season, speak with one of our team today.

**Insure your future with Campyvac & Toxovax**

## Pre-Mating Reminders

- Critical to get it right - impossible to correct any mistakes until next season
- Determines the potential performance of your flock for the upcoming season
- Nothing can increase scanning percentages once mating has finished

#### Things to check include:

- Ram health and soundness
- Trace Element status
- Ewe body condition
- Ability of the ewe to conceive and maintain pregnancy
- Feeding levels

## 2 Tooth/Hogget Pre-mating Animal Health Programme (example for early April mating)

Feb 5 <sup>th</sup>	March 5 <sup>th</sup>	April 5 <sup>th</sup>
<ul style="list-style-type: none"> <li>• First Campyvac 4 shot (Sensitiser - 1ml/subcut)</li> <li>• Toxovax Shot 2ml (intramuscular)</li> </ul>	<ul style="list-style-type: none"> <li>• Second Campyvac4 shot (Booster - 1ml subcut)</li> <li>• Flexidine 1.5mls (intramuscular)</li> </ul>	<ul style="list-style-type: none"> <li>• Put the ram out</li> </ul>

## Ram Soundness

Ensuring your rams are ready to get the job done is imperative! Rams should be checked at least 8 WEEKS PRIOR to mating.

- Lameness - check feet as it may impair their ability to mate
- Ram Palpations - quick / cheap way to reduce fertility problems
- Detection of the B. ovis

**Contact us to book your rams in for their annual visit.**

## Veterinary Centre WOOF - W.O.F.

*A Warrant of fitness for your working dog*

- Engine:** Heart, Lungs and Abdomen
- Tyres:** Lameness, Arthritis and Mobility
- Bodywork:** Skin, Eyes Ears and Lumps
- Fuel:** Teeth, Body Condition and Diet

**Book your farm dogs in for this Health Check and Vaccination Service, done on farm, when a vet is in your area!!**

## Flexidine

Total Long-Acting Protection against Iodine Deficiency

### Can you justify an investment in iodine?

Lamb survival is the biggest area of potential gain in sheep production. A 3000 ewe flock scanning 160% and tailing 130%, only needs to save an extra 20 lambs to get a return. That is only 0.5% increase required. If you close the lamb loss gap by 5% due to iodine supplementation that is another 150 lambs. At \$120/lamb that is another \$18,000 income from a \$2,400 investment.

There is enough evidence to show iodine is an issue in high country areas and when ewes are wintered on brassicas. Iodine deficiency has a part to play in the lamb birth weight and survival complex.

#### CONCLUSION

**Iodine can be justified financially very easily with less than 1% lift in lamb survival.**

\*Only available with veterinary prescription

Keeps them full of life

**25KG OUR PRICE \$57.90**

**BUY 14 GET 2 FREE!**  
= \$50.66 PER BAG
