**Specific drench for deer!**  
Triple action drench will reduce worm burden and increase growth rates.  
Discuss the benefits with your vet of a well organised parasite management plan.

**Invest in your farm's future!**  
Know your drench status by doing a reduction test.

Organise a full  
**Faecal Egg Count Reduction Test (FECRT)**

**Weaning is the time to do a FECRT**

The purpose of a FECRT is to provide you with data on the drench effectiveness and resistance status of the parasite population on your property. This will help ensure that the drenches you use on your farm are highly effective. A significant driver of drench resistance is the continued use of ineffective drench products.

**"You can't afford to be drenching with a product that doesn't work!"**

# Abortion Storms

## Two Diseases Two Vaccines

**Order ToxoVax NOW!**

Toxoplasma is present on 100% of New Zealand farms, and Campylobacter on 88%\*1 – but both are equally important. These two diseases can cause abortion storms with losses up to 30%, or more, of lambs\*2,3.

Preventing them takes two vaccines. Maiden ewes require 1 dose of ToxoVax and 2 doses of CampyVax4 ahead of mating.

A booster of CampyVax4 is required in the following year, and an annual dose is recommended before mating is completed.

### ToxoVax

- ✓ Controls the risk of Toxoplasma. **Live** vaccine.
- ✓ Up to 8% higher lambing percentages (3% national average).
- ✓ Vaccinate at least 4 weeks prior to first mating.
- ✓ One shot gives a lifetime immunity.
- ✓ **MUST BE ORDERED AT LEAST 4 WEEKS IN ADVANCE OF TREATMENT** to ensure availability.

### CampyVax4

- ✓ Controls the risk of Campylobacter.
- ✓ Increase lambing by an average 9%.
- ✓ Protect maiden ewes with TWO shots 4-6 weeks apart, and one booster shot in previously vaccinated ewes.

### Example for early April mating 2 Tooth/Hogget Pre-mating Animal Health Programme

# Veterinary Centre

by the Big Blue Cross

## Flexidine

For the treatment of Iodine deficiency in sheep from mating to weaning.

Use 4-6 weeks pre-tup for Iodine supplementation, in a sustained release formulation.

\* This is a prescription medicine only available following a veterinary consultation.

## Pre-Mating Reminders

It is critical to get it right, as it is impossible to correct any mistakes until next season. Effective pre-mating actions determines the potential performance.

**Nothing can increase scanning percentages once the mating has finished!**

### Things to check include:

- ✓ Ram health and soundness
- ✓ Ewe body condition
- ✓ Feeding levels
- ✓ Trace element status
- ✓ Ability of the ewe to conceive and maintain pregnancy

**Don't leave your ewe flock unprotected ... it's not worth the risk!**

## Best Nutritional Puppy Food

### The best nutrition for your puppies development

**Digestive Health** – balanced intestinal flora (prebiotics: FOS, MOS)

**Natural Defences** – complex antioxidant including vitamin E

**Mineral Balance** – ensure robust skeletal development with calcium and phosphorus

**Royal Canin Medium Puppy Pro** for up to 12 months old with an expected adult weight of 11-25kg.

**SHORT GROWTH/ HIGH ENERGY** – high energy needs of medium breed puppies which have a shorter growth period.

16kg  
**\$135.70**  
Incl GST

**Royal Canin Maxi Puppy Active Pro** for up to 15 months old with an expected adult weight of 26-44kg

**CONCENTRATED ENERGY** – larger breed puppies have a longer growth period and have a different energy and immunity requirement.

20kg  
**\$159.90**  
Incl GST

## Novel Drenches

5 litre  
**\$1395** Incl GST  
**SAVE \$24**

**When do I use them?**  
The most effective drenches available ... use strategically.

Research has shown one strategic drench in Autumn with Zolvix or Startect will clean out any resistance and extend the effectiveness of other drenches.
