### Ultimate Triple Sheep Drench

## Do the same drench ingredients always give the same result?

**NO!** According to NZ research published in the international journal "Veterinary Parasitology" Cattle were tested for faecal egg reduction on six different farms comparing different drench treatments.

- Eclipse was the significantly superior pour on achieving average egg reduction of 98% in a tight range, the lowest result being 93%.
- The other pour on brand gave an average egg reduction of 85% with a wide range of performance, some results being as low as 40% egg reduction.
- Trial by Leathwick et al, Veterinary Parasitology, 2016

The Veterinary Centre stocks proven animal health products that we know will perform. We will always be competitive but never at the expense of quality or productivity.

# Abortion Storms

## Two Diseases Two Vaccines

Order ToxoVax TODAY!

Toxoplasma is present on 100% of New Zealand farms, and Campylobacter on 88%<sup>1</sup> - but both are equally important. These two diseases can cause abortion storms with losses up to 30%, or more, of lambs<sup>2,3</sup>.

### ToxoVax

- ✓ Controls the risk of Toxoplasma. **Live** vaccine.
- ✓ Up to 8% higher lambing percentages (3% national average).
- ✓ Vaccinate at least 4 weeks prior to first mating.
- ✓ One shot gives a lifetime immunity.
- ✓ **MUST BE ORDERED AT LEAST 4 WEEKS IN ADVANCE OF TREATMENT** to ensure availability.

### CampyVax4

- ✓ Controls the risk of Campylobacter.
- ✓ Increase lambing by an average 9%.
- ✓ Protect maiden ewes with TWO shots 4-6 weeks apart, and one booster shot in previously vaccinated ewes.

AVAILABLE ONLY UNDER VETERINARY AUTHORIZATION. ACVM No's: A4769, A9535, Schering-Plough Animal Health Ltd. Phone: 0800 800 543. www.msd-animal-health.co.nz

## Flexidine

For the treatment of Iodine deficiency in sheep from mating to weaning.

Use 4-6 weeks pre-tup for iodine supplementation, in a sustained release formulation.

\*This is a prescription medicine only available following a veterinary consultation.

### Pre-Mating Reminders

It is critical to get it right, as it is impossible to correct any mistakes until next season.

#### Things to check include:

- ✓ Ram health and soundness
- ✓ Ewe body condition
- ✓ Feeding levels
- ✓ Trace element status
- ✓ Ability of the ewe to conceive and maintain pregnancy

## Invest in your farm's future!

Know your drench status by doing a reduction test.

### Organise a full Faecal Egg Count Reduction Test (FECRT)

### Weaning is the time to do a FECRT

- Analysis of the major drench activities.
- Larval culture and identification of resistant worm species.
- Full report for effective drench selection and an animal health plan.
