Abortion Storms

TWO DISEASES – TWO VACCINES

Order ToxoVax EARLY!

TOXOVax

- ✓ Toxoplasma is present on **100% of NZ Farms.**
- ✓ Up to **8% Higher Lambing** percentages (3% national average).
- ✓ **Reduction in Dry Ewes** by an average of 13.5%, more lambs.
- ✓ Vaccinate at least **4 Weeks Prior to Mating.**
- ✓ **One Shot** gives a lifetime immunity, no booster required.
- ✓ ToxoVax is a **LIVE** vaccine and made to order. **Order at least 4 weeks prior** to treatment to ensure availability.

CAMPYVax4

- ✓ Campylobacter is present on **88% of NZ Farms.**
- ✓ Campylobacter abortion storms may result in **Lamb Losses up to 30%** in naive flocks.
- ✓ **9% Average Increase in Lambing Percentages** even in farms that do not see abortions.
- ✓ Primary vaccination (eg. Maiden Ewes) requires **Two Shots 4-8 weeks Apart.**
- ✓ Subsequent years (eg. Mixed -Age Ewes) require a **Single Booster Shot.**

Don't leave your ewe flock unprotected ... it's not worth the risk!

Flexidine

For the treatment of Iodine deficiency in sheep from mating to weaning. Use 4-6 weeks pre-tup for Iodine supplementation in a sustained release formulation.
* This is a prescription medicine only available after a veterinary consultation.

Pre-Mating Reminders

It is critical to get it right, as it is impossible to correct any mistakes until next season. The work pre-mating determines the potential performance of your flock for the upcoming season. Nothing can increase scanning percentages once the mating has finished!

Clostridial Vaccine

MULTINE

5-in-1 Clostridial Vaccine
The proven performer for cost effective control of five clostridial diseases.

NOTE Multine Selenised is not for use on lambs under 30kg.

DOSAGE REQUIRED: Sensitizer Dose in first year needs to be followed with a Booster 4-6 weeks later, and a Booster every 12 months thereafter.
