IMPORTANT

For best results apply Pour-On Lice Control as soon as practical after shearing. The sooner the chemical is applied the more effective it is.

- 4. Deferred Payment Terms** on long acting capsule purchases.

COMPARISONS OF LONG ACTING EWE ANTHELMINTIC PRODUCTS

*Bionic Plus *Extender SeCo *Exodus LA *Cydectin LA

3 Reasons For Using Long Acting Products in Ewes

- 1. Ewes hold condition and are heavier at weaning.**
- 2. Lambs are heavier at weaning benefiting from ewes milking more (especially with multiples).**
- 3. No Dags!**

Products currently marketed

Bionic PLUS – A 100 day combination capsule with continual release of abamectin (new improved formula with 15% more abamectin) and albendazole, plus selenium and cobalt. Withholding time 126 days.

Extender SeCo – A drench capsule which releases albendazole (white drench family) for 100 days, plus selenium and cobalt. Suitable for ewes up to 80kg. A priming dose of effective drench must be given to the ewes when the capsules are inserted. Withholding time is zero.

Exodus LA and Cydectin LA – These products contain a form of moxidectin injection in a novel base which increases their length of action. It is active against Trichs for 42 days, and Ostertagia for 112 days.

Cydectin Injection – This product contains moxidectin which has some persistent worm killing action following a single injection. It stays active for up to 30 days, but can suppress the egg output of the ewes for much longer. It is best used 2-4 weeks pre-lamb. Withholding time is 28 days for sheep meat.

Eweguard – This product combines Cydectin injection with a 6-in-1 clostridial vaccination.

Clostridial Vaccines

DOSAGE REQUIRED: Sensitizer Dose in first year needs to be followed with a Booster 4-6 weeks later, and a Booster every 12 months thereafter

Nilvax 5-in-1 Selenised **\$124.90** Incl GST

The only pre-lamb vaccine that provides up to 4 months protection for lambs. Vaccinate your ewes earlier to avoid sleepy sickness, or your lambs later with longer duration of protection provided via mother's colostrum.

Eweguard 6-in-1 PLUS SE & B12 **VET ONLY**

Vaccine and long acting Moxidectin Wormer with Selenium and Vitamin B12.

Multine 5-in-1
The proven performer for cost effective control of five clostridial diseases. Available in Plain, Selenised, B12, and B12+Selenised.

The primary preventable clostridial diseases are ...
Tetanus • Pulpy Kidney • Black Disease • Black Leg Malignant Oedema • Sudden Death

rumenox

rumenox
A healthy herd starts inside

- Protects against ketosis, helping cows get in-calf.
- Increases milk protein production.
- Helps prevent bloat.

MULTIMIN TRACE MINERAL INJECTION ENHANCING CALF IMMUNITY

A 2018 New Zealand study¹ demonstrated the health benefits of injecting calves with MULTIMIN[®] early in life. The effect was rapid (within three days of injection), with death and disease consistently halved at all ages that calves were injected.

52% REDUCTION IN DISEASE **58% REDUCTION IN DEATHS**

1. Bates, A., Wells, M., Laven, RA., Simpson, M. (2019) Reduction in morbidity and mortality of dairy calves from an injectable trace mineral supplement. Veterinary Record Published Online First: 25 April 2019. doi: 10.1136/vr.105082.
