Active(s): Spinosad  
For the control of lice on all sheep breeds.  
Nil Meat & Wool Withhold

**10 Litres \$1098.00**  
Incl GST

### IMPORTANT

For best results apply Pour-On Lice Control as soon as practical after shearing, ideally within 24 hours. The sooner the chemical is applied the more effective it is.

### LONG WOOL Pour-On Treatment Options

- 50ml Emergency Treatment for Coarse and Fine Woolled Sheep • NIL meat/wool WHP
- Treats and controls body lice in coarse wool breeds with up to **Six Months of Wool** • 56 days Meat WHP
- Controls body lice in coarse wool breeds with up to **Six Months of Wool Growth** • 3 Day Meat WHP
- Controls body lice in all breeds with up to **TEN Months of Wool Growth** • 7 Day Meat WHP

For advice you can trust!

# Pre-Lamb **WORM DRENCHES**

## STRATEGIES

- Target Treatment**  
Select animals based on risk. Target long-acting drenches towards multiples and light condition stock.
- Refugia**  
Don't drench some stock to ensure that there are still worms that are susceptible to drench in the worm breeding population.
- Trace Elements**  
These treatments are expensive. Only consider them when they give you a significant economic return.
- Information**  
Base your decisions on facts.
  - Trace Element results
  - Drench Checks
  - Feed Budgets

## Is Moxidectin Long Acting the right choice for my farm?

**Involve your Vet** in decision making around moxidectin long-acting injection treatments. Get advice on management techniques like refugia and drench testing, as we try to mitigate parasite resistance ... a real issue on farms today!

### Long Acting Worm Control

- 91 Days protection against *Haemonchus contortus*
- 112 Days protection against *Ostertagia circumcincta*
- 42 Days protection against *Trichostrongylus colubriformis*

## Use Exodus or Cydectin LA for long acting worm control from a single moxidectin subcutaneous injection. Dose 1ml/20kg

### CYDECTIN

Long Acting Injection for Sheep

## MULTIMIN TRACE MINERAL INJECTION

### ENHANCING CALF IMMUNITY

A 2018 New Zealand study<sup>1</sup> demonstrated the health benefits of injecting calves with MULTIMIN® early in life. The effect was rapid (within three days of injection), with death and disease consistently halved at all ages that calves were injected.

**52% REDUCTION IN DISEASE** **58% REDUCTION IN DEATHS**

1. Bates, A., Wells, M., Laven, RA., Simpson, M. (2019) Reduction in morbidity and mortality of dairy calves from an injectable trace mineral supplement. Veterinary Record Published Online First: 25 April 2019. doi: 10.1136/vr.105082.
