

Drenching Dairy Cattle in Autumn

- There is considerable trial work available both nationally and in our district showing that drenching lactating dairy cattle is likely to result in an increase in milk solids production.
- Cydectin pour on and Eprinex are 2 of the most effective anthelmintics, both having significant persistent activity against Ostertagia species of 4 weeks or more.
- Both Cydectin and Eprinex have nil meat and nil milk withholds making their use in lactating herds very easy to manage.
- Genesis cattle pour on is a premium abamectin product with 14 days persistent activity. It has 35 days meat withhold so needs to be managed carefully when making culling decisions.

Whatever your approach to autumn drenching of your herd we are always available to give professional advice on the products available that will optimise your herd performance.

DRENCH CHECK

Doing a Drench Check is the best way to ensure that the drench you've used is working, which is very important with the rising problem of resistance in worms ... it also means you aren't wasting time and money using a drench that isn't effective. All you have to do is collect the samples we'll do the rest!

Abortion Vaccine Reminder

TOXOPLASMOSIS
ToxoVax must not be given closer than four weeks to tupping.

CAMPYLOBACTER
CampyVax4 two doses, 4-8 weeks apart, given pre-tup.

Flexidine
Increase your potential for more lambs

Flexidine™ provides a long-acting supply of iodine. In deficiency, supplementing iodine leads to:

- ✓ Decreased perinatal deaths
- ✓ Increased lamb vitality
- ✓ Reduced goitre
- ✓ Increased fertility

Only Flexidine™ prevents iodine deficiency from conception to lambing in **one** simple injection.

Only available under veterinary authorisation.

SMARTSHOT® B12 PLUS Se

Smart Shot long acting B12 and selenium restores deficiencies with the convenience of just one injection over a 6 month treatment period.

SmartShot B12 + Se - 500ml
\$689.00
Incl GST

- 0.5ml (\$0.60 + gst) for lambs for slaughter for 3 to 4 months supplementation
- 1.0ml (\$1.20 + gst) for ewe replacements for 6 to 8 months supplementation.
