SMARTSHOT B12 PLUS Se

long acting Selenium and B12 restores deficiencies with the convenience of just one injection.

- B12 & Selenium for up to 6 months in sheep.

Selenium Deficiency

COBALT Deficiency

Selenium and Cobalt deficiency is common in NZ as you can see from the maps. Our area is traditionally low in Selenium.

Lambs: 0.5ml (\$0.63 + gst) for lambs for slaughter for 3 to 4 months supplementation
1.0ml (\$1.27 + gst) for ewe replacements for 6 to 8 months supplementation.

Clostridial Vaccine

DOSAGE REQUIRED: Sensitizer Dose in first year needs to be followed with a Booster 4-6 weeks later, and a Booster every 12 months thereafter.

Multine 5-in-1
The proven performer for cost effective control of five clostridial diseases.

Multine B12 (ACVM A011311)

Multine Senselised (ACVM A00935)

Multine B12 + Senselised (ACVM A011766)

NOTE: Plain, B12 or B12 Senselised to be used on new lambs, do not use Senselised Only on lambs.

COVEXIN 10 **VET ONLY**

The most extensive clostridial cover available in New Zealand.
*Only available from your local Veterinary Centre.

The primary preventable clostridial diseases are ...
Tetanus • Pulpy Kidney • Black Disease • Black Leg • Malignant Oedema • Sudden Death

Scabigard Vaccine

Controls scabby mouth disease in lambs and sheep.

- 1 Scratch
- Easy to use
- Accurate dosage

PAR Prescription ONLY

Benefits of Tapeworm Drenching in Lambs

A 2011 New Zealand Beef and Lamb trial was set up to analyse the benefits of a pre-weaning drench, 3 to 4 weeks prior to weaning from mothers.

The findings were that ...

- A drench pre-weaning improved weaning weight by 1kg.
- Adding the tapeworm active (praziquantel) to the triple drench did improve growth rate at weaning by 25gm per day compared to the standard triple combination drench.
- Dag scores were further reduced with the inclusion of tape drench compared to straight triple drench.

PLUS Praziquantel for TAPEWORM

* Replaces First Hi Mineral Oral Drench for Lambs

Corporal +Tape
