

Do the same drench ingredients always give the same result?

NO! According to NZ research published in the international journal "Veterinary Parasitology" Cattle were tested for faecal egg reduction on 6 different farms comparing different drench treatments

The Veterinary Centre stocks proven animal health products that we know will perform. We will always be competitive but never at the expense of quality or productivity.

- Eclipse was the significantly superior pour on achieving average egg reduction of 98% in a tight range, the lowest result being 93%.
- The other pour on brand gave an average egg reduction of 85% with a wide range of performance, some results being as low as 40% egg reduction
- Trial by Leathwick et al, Veterinary Parasitology, 2016

Scabby Mouth Won't Go Away!

Scabby Mouth is a serious disease, and once it is on a farm, it's there for life. It poses a serious risk to lambs, every season. This highly contagious disease usually affects lambs during the key period of growth, affecting your ability to finish lambs and reducing your profits. Infection spreads rapidly and can affect up to 100% of the lamb mob. Scabby mouth is spread by direct contact with infected sheep and lambs, or via contaminated pasture or equipment. Typically abrasive type pastures increase the risk of disease. Vaccination is the only practical way to increase protection for your lambs. It should be an essential part of docking/ tailing this, and every spring.

Scabigard[®]
PURELY POTENT

- 1 Scratch
- Easy to use
- Accurate dosage

Only available following a Veterinary Consultation

Controls scabby mouth disease in lambs and sheep.

Pre-lambing dose for Ewes which will give lambs a good start, and a booster with B12 at tailing for lambs!

Unite against COVID-19

During all Covid-19 Levels the Veterinary Centre is deemed to be an essential service.

Alert Level 4

Our doors are closed but we are operating Call n Collect and Contactless Deliveries for all essential supplies and we have procedures in place for providing essential animal health services.

Alert Level 3

Our doors remain closed and all Level 4 procedures remain in place, but we can now supply non-essential supplies and service.

Alert Level 2

We will have the doors open again but will have procedures in place to ensure everyone's safety, including 2m spacing.
