TRACE ELEMENT Sheep Supplements

VET LSD VETERINARY LIVESTOCK SURVIVAL DRENCH

contains Vitamins A, C, D, E, Selenium, Chromium & Iodine

Given to ewes Pre-Tup and Pre-Lamb for enhanced lamb survivability.

High on Performance, Survivability and Profit!

SMARTSHOT B12 PLUS Se

long acting Selenium and B12 restores deficiencies with the convenience of just one injection.

- B12 & Selenium for up to 6 months in sheep.

COBALT Deficiency

Selenium and Cobalt deficiency is common in NZ as you can see from the maps. Our area is traditionally low in Selenium.

Lambs: 0.5ml (\$0.63 + gst) for lambs for slaughter for 3 to 4 months supplementation
1.0ml (\$1.27 + gst) for ewe replacements for 6 to 8 months supplementation.

Clostridial Vaccine

Multine 5-in-1

The proven performer for cost effective control of five clostridial diseases.

The primary preventable clostridial diseases are ...
Tetanus • Pulp Kidney • Black Disease • Black Leg • Malignant Oedema • Sudden Death

NOTE Plain or B12 to be used on new lambs, do not use Selenised on lambs.

Multine B12, Multine Selenised, Multine B12 + Selenised

Scabby Mouth Won't Go Away!

Scabigard Vaccine

Controls scabby mouth disease in lambs and sheep.

- 1 Scratch
- Easy to use
- Accurate dosage

Scabby Mouth is a serious disease, and once it is on a farm, it's there for life. It poses a serious risk to lambs, every season.

This highly contagious disease usually affects lambs during the key period of growth, affecting your ability to finish lambs and reducing your profits. Infection spreads rapidly and can affect up to 100% of the lamb mob. Scabby mouth is spread by direct contact with infected sheep and lambs, or via contaminated pasture or equipment. Typically abrasive type pastures increase the risk of disease. Vaccination is the only practical way to increase protection for your lambs. It should be an essential part of docking/tailing this, and every spring.

Allflex Official Calf Tags

Newborn calves must be tagged with NAIT-approved RFID tags within 180 days of birth, or prior to their first off-farm movement.

Calf Debudding Service

We offer a gold standard calf debudding service using both sedation and local anaesthetic to minimise calf discomfort and reduce liveweight losses due to stress. While sedated, it provides a great opportunity to check the calf for extra teats, give a 10 in 1 vaccination and NAIT ear tagging.

Includes
topical
anaesthetic

Fee **\$7.74** Per Calf
Excludes GST

(Excludes travel costs – a surcharge applies if fewer than 25 calves are debudding)
