Bring the Wildlife into your Backyard

Common Birds in Our District

Waxeye – also known as the Silvereye, the Tauhou is the NZ native we see most. They are frequent visitors to bird feeders, especially if energy rich food is on the menu.

Fantail – Gentle and curious little souls the Piwakawaka show up regularly in rural gardens, forests and parks. Around a feeder they can get pushed to the side by the larger, more aggressive birds.

Goldfinch – the goldfinch are seed eaters who prefer the smaller thistle and weed seeds. They are also handy at keeping garden pests like aphids at bay. A flock of goldfinches is aptly known as “a charm”.

Tui – The song of a Tui is the sound of home. And good news – Tui numbers are on the rise, thanks to urban restoration projects. They love a good gulp from kowhai or flax flowers. Put out a nectar feeder and they'll visit daily.

Attract wild birds to your garden

The first thing is to provide a safe feeding area, like a small table. Position it away from windows so the birds don't fly into them and away from places where cats can pounce. You can suspend the table top from a branch or at least 1.7m off the ground. Having a birdbath is also a good idea. Birds will drop into bathe or just for a drink. However, the water should be cleaned regularly as it can become contaminated with droppings. Also be wary of pests, particularly rats or stoats – setting a trap for these pests will make your garden a true sanctuary.

Which food for which Bird?

Energy Cakes - Sparrow, Waxeye, Chaffinch, Goldfinch, Greenfinch

Nectar - Tui, Bellbird, Waxeye, Saddleback

Gourmet Hanging Treat - Sparrow, Waxeye, Rosella

Wild Bird Seed - Finches, Sparrow, Redpoll, Starling

Mealworms - Sparrow, Waxeye, Blackbird, Starling.
