Why treat my pet regularly for flea and worms?

Initially fleas will cause small irritations from biting your pet, which left untreated can lead to severe itchiness, secondary skin infections and even anaemia! Breaking the cycle is important.

Worms can upset your pet's digestion and lead to vomiting, weight loss and loss of a normal body condition in serious cases. Some of these worms can be transferred to humans.

Dog and Cat Vaccinations

Vaccination protects your pet against infectious diseases, while also protecting other animals and humans from the circulation of those diseases.

In the first year several injections are necessary to develop a strong, effective immunity. Once an adult, regular booster vaccinations are necessary for the protection to remain effective.

ESSENTIAL HOLIDAY ADVICE

5 things to consider this Holiday Season!

● VACCINATIONS

Keep your pets healthy with a current vaccination, a must if leaving your pet in a cattery or kennel over the holidays. Routine flea and worm treatment is also advisable.

● MEDICATIONS

Don't let your pets prescription medication run out over the holidays, we need at least 24 hours to process requests. Also consider anti-nausea medication for longer trips.

● MICROCHIPPING

Don't lose your pet these holidays! Legally all domestic dogs should be microchipped, but you can also chip your cat.

● HEATSTROKE

Make sure your pets don't overheat - especially if traveling in the car. Make frequent stops and NEVER leave your pet unattended in a hot car. Always have access to water and shade.

● JUNK FOOD

Keep all chocolate, wrapping, cakes, ribbons, string etc away from your pet! These should be kept for the humans of the family!

Don't forget about us this holiday season!
